TECHNICAL QUESTIONNAIRE

Data overview for fermentation residue refinement using the **GÄRREV** System

Name/Company:

Contact person:.....Planner :.....

Adress

Tel.:.....Fax:.....

Email:

1) What are the input materials of the biogas plant?

Maize _____ ton/year with _____ % DS

Liquid manure _____ ton/ year mit _____ % DS

Grains _____ ton/year with _____ % DS

Water _____ ton/year with _____ % DS

Others _____ ton/year with _____ % DS

_____ ton/year with _____ % DS

_____ ton/year with _____ % DS

_____ ton/year with _____ % DS

2) Quantity of fermentation residues and their consistency?

Fermentation residues _____ ton/year with _____ % DS

3) Type of existing / planned Biogas plant/ factory ?

Manufacturer: _____

Own heat requirement: _____ % Of CHP waste heat

May we contact the manufacturer ? yes No

5) Data of the CHP ?

_____ kW_{el.} _____ kW_{th.} Manufacturer: _____

_____ kW_{el.} _____ kW_{th.} Manufacturer: _____

_____ kW_{el.} _____ kW_{th.} Manufacturer: _____

_____ kW_{el.} _____ kW_{th.} Manufacturer: _____

May we contact the manufacturer ? yes Not

6) How are fermentation residues to be used ?

Concentrate utilization (or drying?):

Utilization of pellets:

Utilization of condensate:

7) Present use/application of fermentation residue

Type:

Costs resp. revenues (eventual transportation costs incurred)?

8) Present resp. planned heat utilization ?

Type:

Heat quantity: (% or kWh_{th}/year)

9) When was commissioning effected or is intended?

.....
.....
.....
.....

10) Further specific data

.....
.....
.....
.....
.....

Date:..... Signature:.....
